SAHMRI - Construction site visit

North Terrace, cnr Gray St, Adelaide

Monday 9th July at 4.30pm

The South Australian Health and Medical Research Institute (SAHMRI) Facility is a Federally Funded $200 million development and will be state-of-the-art and purpose-built research facility, with cutting-edge technology and equipment.

This new building will be truly extraordinary, both within Australia and around the world, delivering on the key project vision of "a thing of the world in Adelaide". To achieve this, integration of building function and form were brought together in the very early days of the design process, fostering a collaboration of ideas and thoughts from all members of the design team

The construction program is due to complete in late 2013. Once complete, the facility will provide:

- 25,000 square metres of gross floor area, capable of housing 700 researchers
- Flexible floor space and nine research modules
- A vivarium and dedicated space for advanced technology facilities, including a cyclotron
- Open public space areas
- Cafes and retail stores
- Education space

The building will consist of 3 storeys below plaza which will house car parking, services and a vivarium. The superstructure (above plaza) will consist of 6 storeys of office space, research laboratories and plant equipment. The structure is a typically a reinforced concrete frame with post-tensioned slabs. The superstructure has 36 columns locations that support the building above reduced to just 6 main support locations at Plaza level, by the use of "flower columns". These innovative structural elements avoid a "forest of columns" at ground level, enhancing the overall architectural design by creating the illusion of the building "floating" above the ground plane.

This visit has kindly been organised by Aurecon in conjunction with SAHMRI & DPTI

Attendance at Concrete Institute of Australia events may be credited towards Engineers Australia and other organisations' Continuing Professional Development (CPD) requirements. (Engineers Australia members are required to undertake a minimum 150 hours of equivalent CPD every three years).

SAHMRI – site visit

Attention:- Lavinia Russell

Please register the following persons to attend on 9th July 2012

Company:-
……

1. _____

2. _____

3. _____

4. _____

5. _____

Due to site regulations and to ensure that as many of our members as possible have the opportunity to attend this event we have to limit numbers to a maximum of 5 per company.

FAX this form back to 02-9966-1871 by 4th July 2012

** This is a FREE event**

*** PARKING is available nearby ***

Safety Equipment is essential
[safety glasses & shoes, hard hat, high visibility vest.]
